

The [Best Jordans Shoes](#) has been utilizing materials outside of the typical leather on the Jordan XII over the past year. Wool, Nubuck and Suede have all been featured on Michael's 12th. With this upcoming release, it appears as though it will follow the trend.

Taking on actually a couple elements from previous colorways, this [Latest Jordans Shoes](#) has been dubbed the "Dark Grey" Colorway. Taking on a suede grey upper, it instantly becomes reminiscent of the OG PSNY x Jordan XII. Utilizing Gold Eyelets and branding on the back tab (à la "Taxi"), the shoe adds some contrast to it. The Mudguard will be Dark Grey, and the shoe is completed with a Light Grey sole and tongue branding. Unfortunately, [Cheap Jordan Shoes](#) will not be a retro of the Jordan 13 "Wheat" that released in 2004. However, it will be similar to the rest of the Jordans released in the "Wheat" colorway this year, and this Jordan 13 will feature an all wheat look, from upper to outsole. Additionally, it appears as though a second set of laces will accompany the shoe.
