

Lebron James become one of the legendary in the sport from his 18 year old to now which win the champion in 2016 . That is the most inspirational in 2016 . All of fans are cry for him .as a great champion of Cleveland's , everyone are proud of him.Nike also catch the chance to signed the lifelong contract with James ,Nike LEBRON 14 boots was released in his first year ,Now we get it .

Though [Nike Lebron 14 Red Carpet For Sale](#) is simply , the details is very elaborate which signed by James

The logo of 330 shows in the heel medial , which is the code of Akron ---the birthplace of James . He love his birthplace sincerely , also 330 logo is a part of his body which a tattoo on his shoulder.

BBZ logo is appearance in the right medial of shoes , which from nickname of his three children .

Sphere tongue :

The inside of tongue has one logo of Akron ,also have map texture of Akron .He shows his love for his birthplace again .

James used the fabric of Sphere of Air Zoom Generation, it is amazing for that when i touch it .though Jame 14 use the new tech and new material ,but the details of tongue show the respect for the original .

His tattoo of left shoulder also used in the shoes. ' PLYR No. XXIII est 1984 ' in the left hill and 'MDL No.XIV est 2016 ' in the right hill .

Here are some details as below :

### 1.Cushion:

[Cheap Nike Lebron 14](#) used the Hex zoom air this time , yeah ,Hex Zoom Air returns , but this time around the units are larger than ever before.It is a great news for the fans . The three Hex Zoom units seen above are roughly 14mm thick ▪ that' s a huge Zoom unit.

Do you remember that [KD 10 For Sale](#) , it is not soft than CP3, 10 or hyperrev2016, but will be great , they provide upon initial impact is great and since the 14mm doesn' t compress much upon foot strikes you' re able to maintain a much quicker response time between movements than you would if you sunk into the cushion.

### 2.Grip

The new parts of grain in the sole , it is awesome for grip , O love this parts . They allow for greater flexibility which player in the court .For me ,but if it is the super grip for the player .Sometimes it will too much block the player , especial when move quickly .

### 3.Durability

I just playing two games ,so about the durability is need to time to test . For me , I graduated from school , but not playing everyday like old days , so the durability not the top option for me .

But as my experience , the material of sole is great .especial support the grain of sole .

#### 4,Material

In terms of actual performance, the foam and mesh build do its job well. It's flexible and moves well with your foot without feeling overly restrictive. If you played in the Zoom "Soldier" 10 then it's the exact same feeling. Some might not enjoy it as it could be too soft/flimsy for them, but I did.

Overall , The NIKE LeBron 14 is perfect, Impact protection and overall mobility are two really great features of the shoe. Forefoot stability and overall containment upon lateral moves is something that is hopefully addressed with the Elite model. Though traction wasn't the best, it'll get the job done so long as you keep it clean. <http://www.kd10sale.com/>
