

The [Drop Jordan](#) has considerably cooled down since it's explosion onto the scene last year. However, whether or not you feel it's due to oversaturation or something otherwise, the NMD R1 still has seen some solid colorways this year every so often. One on the way might be this collaboration between adidas and size?Dressing this upper up in a colorway dubbed as "Solar Orange", the shoe features hits of black on the upper and eyelets, as well as the EVA inserts. The shoe's white BOOST cushion system is offset by the black outsole.

The palette for [Buty Jordan Sklep](#) releases usually come in turquoise and gold. However, this release of the Nike Dunk High eschews from that and actually is done in Red and Black. The shoe utilizes a black leather upper that features embossed graphics with a red swoosh and N7 branding on the tongue. The shoe utilizes a textile print between the upper and black midsole, and the whole shoe sits on a gum outsole.

The [Cheap Air Max](#) will debut in the "Rip City" colorway, which is the home colorway of the shoe. The upper is a white primeknit base with detailings inside of the perforations of the knit. Hits of red and black adorn the shoe, specifically on the heeltab and tongue. Also, the midsole is black, with Lillard choosing BOUNCE cushioning over BOOST in order to keep his shoe at a lower cost. Lastly, the shoe sits on a white outsole.
