

This [Drop Jordan](#) release in 2017 carries the color of “Wheat” with the official colors strictly being Golden Harvest and Sail Golden Harvest. Now, unless you’re an art major, you’ll note that the color is really just a beautiful combination of what appears to be brown and gold. It’s tough to pin down the actual shading ▪ but if Nike prefers to call it “Wheat”, who are we to argue?

The texture of the [Air Jordan 11 Win Like 96](#) themselves is worth noting. Rugged and pockmarked, the wheat color is beautifully contrasted by the whiteness of the soles. Other than the white soles however, everything else is done in the wheat coloring with just slightly different shadings.

What makes these [Buty Jordan Sklep](#) distinctive? The silhouette itself is the tipping factor as the shoes offer a display of layered suede that just jumps out of the panel. Instead of going crazy with various colors, Air Jordan opted for the tried and tested method of letting the silhouette do the talking for them. With the Air Jordan “Golden Harvest”, you can easily decipher an amazing structure of depth and shades.

To make these [Cheap Air Max](#) even more amazing, the Jumpman icon can be seen right on the center of the tongue. The tongue by the way, is done in a deeper shade of brown-gold with the Jumpman primarily white and a tad larger than the typical icon. On the top you can see the words JORDAN embossed in the darker shade of brown-gold. The lace lock is the same color as the tongue and displays the Jumpman icon.
